

The black box testing script files are **testing.py** and **input_partition_tests.py**.

The whitebox testing script files for mutation testing are **checkout_mutation_testing.py** and the test script files for statement coverage are **statement_coverage_testing.py**.

Instructions to run code

- modify absolute path of **restaurant-menu.csv** in **restaurant.py** and **restaurant_init_helper.py**
- modify absolute path of **restaurant.csv** in **restaurant_init.py**
- For testing, run either
 - **testing.py** (for test cases from Assignment 3)
 - **input_partition_tests.py** (for test cases from Assignment 4)
 - **checkout_mutation_testing.py** or **statement_coverage_testing.py** (for test cases from Assignment 5)
 - or **main.py** and follow the prompts for choosing actions.

For testing login and/or profile modification, we have created a couple preexisting test users:

- User 1
 - email: bob@gmail.com
 - password: bobisepic123
- User 2
 - email: janed@gmail.com
 - password: janedoe123
